EDUCATION

International Institute of Information Technology Bangalore
Dual Degree (B.Tech + M.Tech) in Computer Science and Engineering

Jul 2023 – Jul 2028
CGPA: 3.44/4.0 [link](#)

EXPERIENCE

IIITB - Research Project - Video Analysis Framework

Jan 2025 – Dec 2025

- Benchmarked **5 deep learning architectures** (ViViT, VideoMAE, YOLOv8, ResNet-CRNN, PoseNet) on **40,000+ videos** across **3 datasets** (UCF-101, UCF-Crime, Kinetics-400) for human action recognition and violence detection.
- Achieved **99.96% accuracy** and **0.99 F1-macro** with VideoMAE across **101 action classes**; attained **96.5% top-1** and **100% top-5 accuracy** with YOLOv8 for violence classification.
- Built a real-time skeleton-based recognition pipeline supporting **multi-person tracking (up to 5)**; conducted systematic hyperparameter tuning and identified a **4.3% accuracy gain** from dataset scaling (350→2000 samples).

ACHIEVEMENTS

- **2nd Prize:** TruthTell Hackathon (WAVES Summit 2025) | top 2 of 5,600+ global submissions. [link](#)
- **3rd Runner-Up:** Google Gen AI Exchange Hackathon 2025 | 4th place among 270,000+ developers nationwide. [link](#)
- **2nd Prize:** MERNify, MERN Stack Hackathon at Synergy'24 | IIITB's tech fest with 3,500+ participants.
- **Dean's Merit List:** Named to the Dean's Merit List for academic year 2023-2024 [link](#)

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, C, JavaScript, SQL
- **Technologies/Frameworks:** MongoDB, FastAPI, PyTorch, Node.js, Express.js, React, NumPy, Scikit-learn
- **Databases:** MongoDB, MySQL
- **Cloud & Deployment:** Docker, Google Cloud Platform
- **Developer Tools:** Git, Jupyter Notebook

PROJECTS

Matrix of Truth | *FastAPI, Gemini AI SDK, Google Cloud Platform, PyTorch* | [link](#)

Sep 2025 – Nov 2025

- Engineered a multimodal misinformation detection platform spanning text, image, video, and audio using FastAPI and Gemini AI SDK.
- Containerized and deployed the full application on Google Cloud, owning CI/CD configuration and infrastructure as the team's DevOps lead.
- Developed and trained deepfake detection models for video, image, and audio, achieving 90%+ accuracy.

CLI Academia | *C* | [link](#)

Apr 2025 – May 2025

- Multi-user educational management system enabling role-based access to relevant aspects of the app.
- Multi-threaded C server with pthread orchestration, TCP socket communication, file-based persistence with flock concurrency control, and semaphore synchronization.
- Supports 100 concurrent connections, 3-tier role system (admin/student/faculty), real-time enrollment tracking with seat capacity management.

High-Frequency Trading Simulation | *C++, Java* | [link](#)

Oct 2024 – Dec 2024

- Built a low-latency C++ order matching engine with a price-time priority book, supporting limit and market orders.
- Implemented market-making and statistical arbitrage strategies, integrating them into a Java-based virtual trading environment.
- Analyzed firm profitability and market condition effects on trading performance.

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Linear Algebra, Machine Learning, Database Systems, Computer Networks, Operating Systems
